With the release of the

SK225SR/SK230SRLC/SK235SR/SK270SRLC, KOBELCO has completely harmonised the values of PERFORMANCE and DESIGN. The SK225SR/SK230SRLC/SK235SR/SK270SRLC delivers greater efficiency and productivity with increased power and speed, along with uncompromising operator comfort and machine operability. In the pursuit of producing unique and unbeatable machines that provide comfort and productivity without equal, KOBELCO continues to rise to the challenge.

THE ULTIMATE SLEEK AND STYLISH CAB DESIGN

True ergonomic functionality combined with modern design has resulted in a cabin interior that is sleek and comfortable, built for simplicity and operator comfort.

Jog dial

The jog dial integrates multiple functions to allow for simple navigation of machine information screens, even while wearing gloves.

LED backlights

LED backlighting on switches and dials provides a bright, clear view of controls, even in the dark, while delivering a premium look and feel.

UNFORGETTABLE COMFORT

Air suspension seat

A GRAMMER* seat is installed as standard equipment, which achieves excellent shock absorption and superior ride comfort. *GRAMMER is trademark of GRAMMER AG. registered in Germany and other countries.

Optimal air conditioning vent placement

Air conditioning vents are optimally placed around the cabin with air flow directed toward the operator's neck and back, providing more comfortable operation.

Ergonomic and low-effort pilot

control levers

Pilot control levers are mounted on adjustable consoles, with an ergonomic design that allows movement without twisting, reducing operator fatigue.

New Hydraulic Control

Our newly upgraded hydraulic control system responds to shorter lever strokes than current models, delivering swifter, more precise movement and improved lever operability.

LED door light

The LED interior light automatically turns on when the door is opened or when the ignition is set to OFF. This ensures easy entry and exit at nighttime.

6

A WIDER VIEW BRINGS A WIDER RANGE OF USE

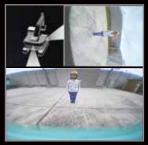

10-inch colour monitor-the largest in the industry

The easy-to-operate menu screen facilitates easy reading and navigation. Images from the built-in cameras can be checked on the large screen, which helps to improve safety. In addition, each icon is easily recognisable.

he right camera and rear camera (straight view mode)

The right camera and rear camera (right side view mode)

The right camera and rear camera (straight view mode)

SAFETY ON FULL DISPLAY

Our high-resolution, large display shows right, left and rear side cameras together. Multiple camera modes allow operators to customise their display based on their needs to enhance awareness and jobsite safety.

Screen display linked with the jog dial operation

The jog dial provides simple and intuitive control of all display screens. Turn the jog dial to the right or left to select an item and press the dial to confirm the selection.

IDEAL FOR URBAN WORK SITES WITH A WIDE WORKING RANGE

Minimal swing radius improves efficiency

The tail of the upper body extends very little past the crawlers, so the operator can concentrate on the job at hand. This also reduces the risk of collision damage.

Easy workability even in Close Quarters

The compact design allows continuous 180° dig, and load operations within a working space of just 4.06m (SK225SR/SK230SRLC) / 3.68m (SK235SR/SK270SRLC).

Figures above show the value for standard boom and standard arm spec * For SK225SR/SK230SRLC ** For SK235SR/SK270SRLC

intes

THE NEXT LEVEL OF PERFORMANCE

Higher Efficiency, plus a Tier IV Final Compliant Engine

The new SK225SR/SK230SRLC/SK235SR/SK270SRLC, is equipped with a Yanmar Tier IV Final Compliant engine, which has a higher torque value. Superior balance between engine output and torque contributes to more efficient performance than the previous models. In addition, the DPF replacement interval has been extended.

Model: YANMAR 4TN107FTT

127 kw/2,000 min⁻¹

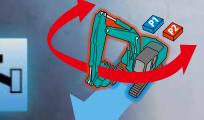

Engine output

Independent Travel

BBR

Selecting Independent Travel dedicates one hydraulic pump to travel and one to the attachment on a continuous basis, allowing for a smooth and constant movement speed even while swinging or using the boom or attachment. With Independent Travel, safely carrying a large pipe across a job site is a breeze.

OBELCO

ф

KOBELCO

E

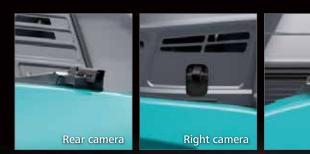

Attachment mode

The flow-rate modes of the bucket, breaker, nibbler, and rotating grapple are set before delivery, which allows you to start operating immediately. Mode settings for other attachments, such as the tilt rotator, can easily be added or changed.

CONVENIENT AND SENSIBLE EQUIPMENT

Left camera

Standard Rear, Left and Right Side Cameras

Seatbelt Unfastened Indicator On Monitor

Machine Guidance Ready Brackets Pre-welded brackets for quicker and easier installation of Machine Guidance Systems.

Console mount The console-integrated seat allows for comfortable operation.

AM/FM Bluetooth[®] (hands-free) radio Audio streaming and hands free phone calling capability.

USB port/12 V power outlet

Smartphone holder You can use the holder with your smartphone connected to the USB port.

Engine start password A password is required when starting the engine for greater security.

Wiper adjustment function In addition to the intermittent wiper mode and continuous wiper mode, the one-time wiper mode was added.

12

Excavator Remote Monitoring System

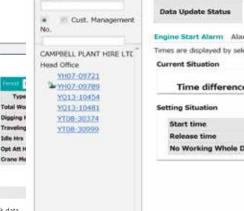

Direct Access to Operational Status

Location Data

•Accurate location data can be obtained even from sites where communications are difficult.

Branch

Customer Nan

Latest location

13

Location records

Work data

Operating Hours

• A comparison of operating times of machines at multiple locations shows which locations are busier and more profitable.

• Operating hours on site can be accurately recorded, for running time calculations needed for rental machines, etc.

Daily report

Maintenance Data and Warning Alerts

Machine Maintenance Data

Provides maintenance status of separate machines operating at multiple sites.
Maintenance data is also relayed to KOBELCO service personnel, for more efficient planning of periodic servicing.

NON-STOP OPERATION BY INDr

Ultimate low noise

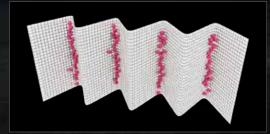

KOBELCO's exclusive iNDr Cooling System delivers amazingly quiet operation.

iNDr Filter

A high-density mesh filter blocks dust intruding during air intake. This prevents the cooling device and the air cleaner from clogging with dust and maintains their performances. The ridges of the corrugated filter allow the air to pass through, and the grooves collect the dust, which prevents the filter from clogging.

The iNDr filter has a high-density mesh of 30 lines per inch to collect dust.

EASY MAINTENANCE

Standard Overhead Top Guard Level II

The standard overhead cab guard can be tilted open with gas damper for easy window cleaning. Meets standard top guard level II requirements. (ISO 10262)

Two-Stage Air Filter

Left Side (Radiator and Cooling System Elements) Laid out for easy access to radiator and cooling system with clean out screen.

DEF/AdBlue® Tank The DEF/AdBlue® fill is placed on the step for easy access.

Right Side (Ground Level Maintenance) Hydraulic pump and engine filter compartment.

Note:

1. Do not attempt to lift or hold any load that is greater than these lift capacities at their specified lift point radius and heights. Weight of all accessories must be deducted from the above lift capacities. 2. Lift capacities are based on machine standing on level, firm, and uniform ground. User must make allowance for job conditions such as soft or uneven ground, out of level conditions, side loads, sudden stopping of loads, hazardous conditions, experience of personnel, etc.

3. Bucket pin attachment point defined as lift point.

b) blocket pin attachment point defined as int point.
 The above lift capacities are in compliance with ISO 10567. They do not exceed 87% of hydraulic lift capacity or 75% of tipping load. Lift capacities marked with an asterisk(*) are limited by hydraulic capacity rather than tipping load.
 Operator should be fully acquainted with the Operator's and Maintenance Instructions before operating this machine. Rules for safe operation of equipment should be adhered to at all times.
 Lift capacities apply to only machine as originally manufactured and normally equipped by KOBELCO CONSTRUCTION MACHINERY CO., LTD.
